

## *ProteinFind*<sup>®</sup> Goat Anti-Mouse IgG(H+L), HRP Conjugate

Cat. No. HS201

Storage: at 2-8°C for one month, at -20°C for one year

### Description

Affinity purified *ProteinFind*<sup>®</sup> Goat Anti-Mouse IgG(H+L) Antibody is a horseradish peroxidase (HRP) conjugated secondary antibody for ELISA and Western blot detection.

### Suggested Dilution

- Western Blot: 1:500-10000 dilution.
- ELISA: 1:500-5000 dilution.

### Notes

- Aliquot prior to use, and avoid repeated freezing and thawing.
- Diluted antibody should be used within 12 hours.
- Sodium azide is an inhibitor of HRP, thus avoid using sodium azide as a preservative in antibody dilution.

*EasySee*<sup>®</sup> Western Marker (5  $\mu$ l/well)
