

Certificate of Analysis

PRODUCT: *EasySee*[®] II Western Marker (30-150 kDa)

CAT. NO.
DM211

AMOUNT
2*250 µl

LOT NUMBER
O10729

SHELF LIFE
Two years

STORAGE CONDITIONS
at -20 °C for two years

SHIPPING CONDITIONS
Dry ice

DESCRIPTION

EasySee[®] II Western Marker is composed of seven proteins ranging from 30 to 150 kDa. The 30 kDa and 120 kDa bands are prestained allowing easy identification and monitoring electrophoresis and membrane transfer. Other five bands contain several IgG binding sites, allowing marker visualization using the same reagents and protocol for your target proteins. These no-dye-attached proteins provide more accurate molecular weight estimation.

- Two prestained bands for monitoring electrophoresis and membrane transfer.
- No label, no dye attached to other five recombinant protein bands.
- Five recombinant protein bands contain IgG binding sites, which can be developed with the standard Western blot substrates.
- Ready-to-use format, direct load on gels without heating.

Certificate of Analysis

QUALITY CONTROL DATA

Assay	Standard	Result
DNA sizes, brightness, and uniformity of intensity of electrophoresis bands	The DNA sizes, brightness and uniformity of intensity of each electrophoresis band of the sample to be tested are basically the same as those of the control sample.	Met standards
Results of protein transfer to the membrane	There are 2 clear bands with low background and no unexpected bands.	Met standards
Purity	After exposure to light, there are 5 clear bands with low background and no unexpected bands .	Met standards

Notice to Purchaser

All products are for research use only. Caution: Not intended for human or animal diagnostic or therapeutic uses. If you have any further questions about this Certificate of Analysis, please contact us at +86-10-57815027 or +86-400-898-0321.
